EXECUTIVE SUMMARY

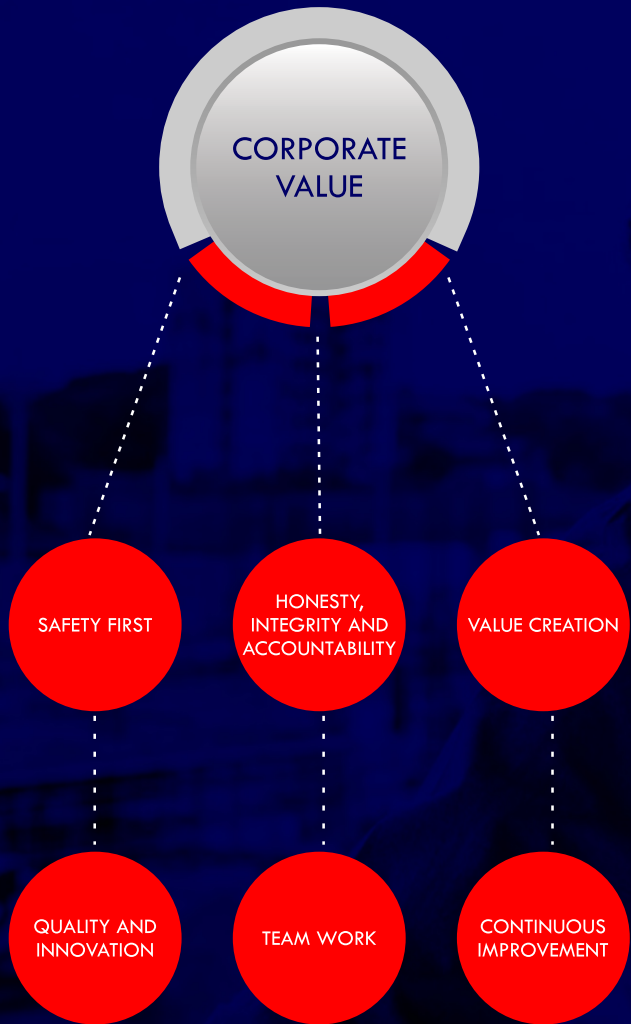

Ruxley Integrated Global Service is wholly Nigerian owned indigenous oil and gas servicing company specializing in provision of engineering services, which includes but not limited to well intervention, construction (civil & mechanical) design, procurement and asset integrity management, production optimization solutions, drilling/production supports, Equipment rentals and project Management to E&P companies.

All realized through our founders demonstrated capacity to consistently deliver optimal solutions that add value to our clients. Over the years, Ruxley Global has gained a high reputation and integrity for Engineering Excellence and superior capability. As an oil and gas servicing company, we are growing strongly through delivery of high quality, safe and reliable services.

Ruxley Integrated Global Service provides solution-oriented services that is based on well analyzed engineering principles with practical evidences. Our Well Interventions and production optimizations solutions include provision of Slickline, Electric wireline, Coiled tubing, Wellhead maintenance, Wellbore clean up and Pumping services. In all of our customized service category, we leverage on experience and deployment of right tools to improve well delivery, reduce Nonproductive time and performance for each well thereby extending the productive life of these vital assets. All our services are adapted to conform to industry acceptable standards, while fully customized to exceed Client's expectations and meet their production objectives and long-term goals.

At Ruxley, we are strengthened by experience, outstanding record for safety and efficiency, and driven by quality performance ethic based on value creation for our clients. To support our objectives, our dedicated, well trained and industry-certified team are led by experts with decades of experience in Engineering, Geosciences and Management. In addition to strategic alliances with International service companies and OEMs, recently we have demonstrated our commitment to quality delivery through acquisitions of various state of the art services equipment.

At Ruxley Integrated Global Service our organizational culture is set shaped by these values system:

Our Vision

To be the leading specialist service provider and clients preferred professional service provider (PSP), through excellency, continuous innovation and efficiency in all aspects of our services.

Our Mission

To offer excellent services in each of our service category in accordance with statutory practices, code of conduct and acceptable standards, thereby developing our team and providing a leading platform which is to serve our valued clients.

Our Values

Our organisational culture is set on core business values that serve as our guiding principles, influence our corporate strategy, and the way we work. Thus, providing much needed foundation for achieving our long-term goals. These values unite and motivate us while setting us apart from competition.

QHSE COMMITMENT

At the center of all our operations is a relentless dedication to always achieve the highest levels of Quality, Health, Safety and Environment (QHSE).

Ruxley Integrated Global Service makes a commitment to conduct its operations in compliance with the existing standards and regulations in the domains of Quality, Health, Safety and Environment. At the heart of our safety culture is our commitment to eliminate all injuries at our facilities and Operations and promote a positive QHSE culture. Ruxley recognizes that a major factor in its business success is the emphasis it has placed on Quality, Health, Safety, and Environment (QHSE) as key elements of all of its activities.

We provide our clients with services which are of the highest professional and technical standards and which comply with client specific QHSE requirements and local statutory requirements. Our QHSE policy and manual provide leadership, guidance and support in promoting a positive HSE culture throughout the organization. We support this ethic by maintaining safe workplaces, providing employee training, complying with safety regulations, and ensuring a demonstrated safety commitment from all employees at all levels of the organization.

Our Services

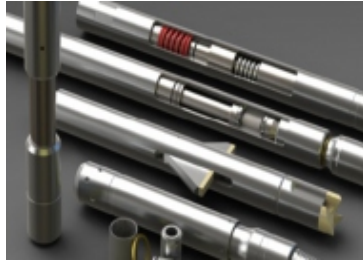

SLICKLINE SERVICES

- Mechanical interventions
- Memory production logging and other services

E-WIRELINE SERVICES

- Open/cased hole logging
- Production logging
- Reservoir monitoring
- Perforation (Wireline and TCP)

COILED TUBING AND NITROGEN SERVICES

- Mechanical intervention
- Stimulation
- Nitrogen lifting

STIMULATION & PUMPING SERVICES

- Wellbore clean up

WELLHEAD MAINTENANCE SERVICES

- First and second line maintenance

LOGISTICS

- Haulage
- Heavy duty movements and lifting services
- Land, marine, swamp and warehousing .

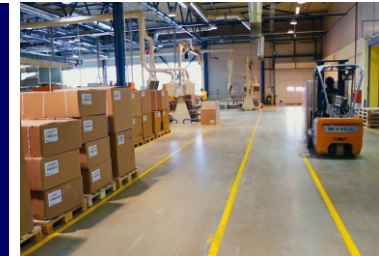

CONSTRUCTION:

CIVIL AND MECHANICAL
-ROAD, BUILDINGS,
BRIDGES AND DRAINS,
TANKS, PIPELINES,
SPOOLS AND FABRICATION.

PROCUREMENT SERVICES

IN-COUNTRY AND IMPORTATION
OF LONG LEAD ITEMS
OUTSOURCING MANAGEMENT
AND CONSULTANCY.

MANPOWER SUPPLY
AND TRAINING

FACILITIES MAINTENANCE & MANAGEMENT
ASSET/INFRASTRUCTURE
INTEGRITY MANAGEMENT SERVICES

Slickline Services

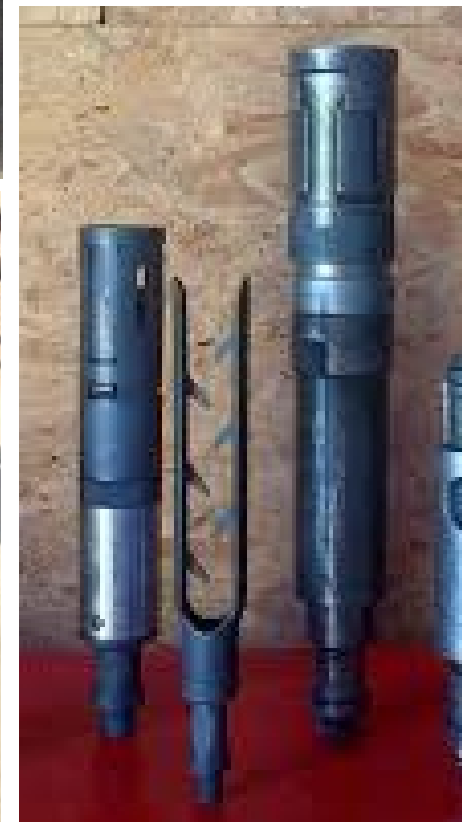

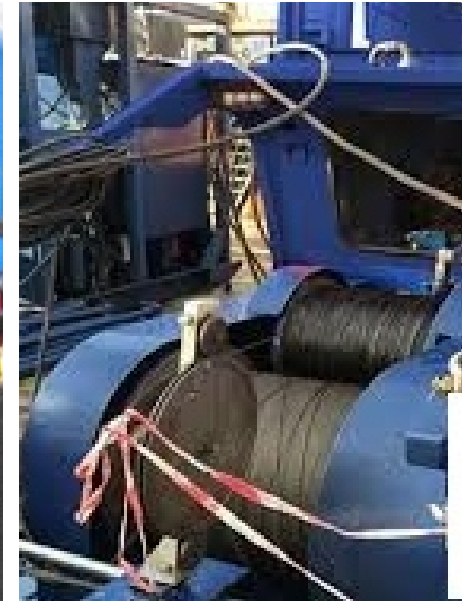

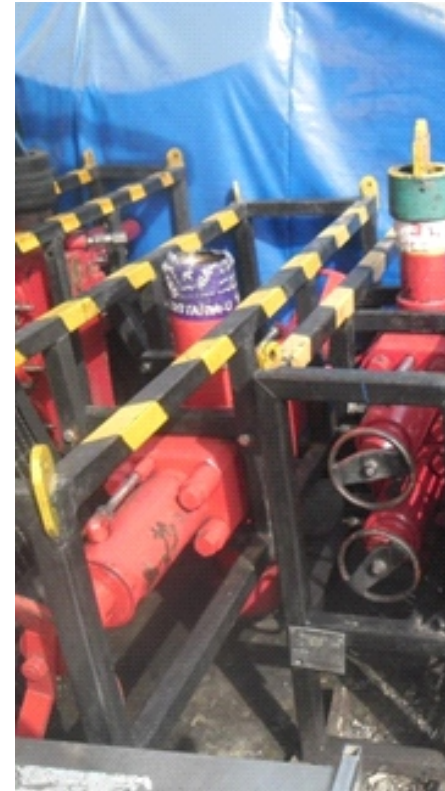

We have extensive slickline services experience ranging from basic removal of scale, wax and sand build-up to advanced services like plug settings, gas lift valves retrieval and reinstallation, fishing and other complex well applications.

Mechanical Interventions

- Cleaning of the well bore, wax removal, scale, sand and other debris removal.
- Setting and removal of flow control devices
- Replacement of gas lift valves
- Control of sliding sleeves to open and close access to zones
- Thru tubing bridge plugs
- Setting of hydraulic packers
- Fishing services

Memory Production Logging and Other Services

- MPLT-Recording accurate flow profiles
- Memory Gauges- measurement of downhole temperature and pressure
- Bottom hole sampling
- Bottom hole shut in

E-Wireline Services

To help clients make informed decisions through data acquisitions, RUXLEY provides a variety of logging services in vertical, deviated and horizontal wells such as:

CASED HOLE

A. RESERVOIR MONITORING

- Production Logging Services (Wireline and Coiled tubing conveyed)

B. WELL INTEGRITY SERVICES

- Cement bond log/radial bond log
- Thru tubing bridge plugs
- Plugs and packers (non-explosive settings tools)

C. PERFORATION SERVICES

- TCP Perforation
- Wireline perforation

D. Leak detection

E. Geoscience/Interpretation

F. Pipe recovery services

OPEN HOLE

Conventional open hole services

Coiled Tubing And Nitrogen Services

Ruxley Integrated Global Service has extensive experience in coiled tubing applications ranging from basic Nitrogen lifting, fishing, milling, clean out. Scale removal, through tubing plug setting, and stimulation, to horizontal logging and other complex well applications. In addition to provision of coiled tubing units suitable for onshore and offshore environment, we continually evaluate and deploy the latest advances and developments in CT applications, equipment, and technology.

We provide:

Pumping Applic

- Acidizing and Nitrogen lifting
- Cement Pumping
- Scale Removal (Hydro-jetting)
- Mechanical Applications
- Fishing or retrieving plugs/packers
- Drilling/ milling
- Tubular cutter
- Selective Zone Isolation and Packers Setting

STIMULATION, PUMPING AND WELLBORE CLEANUP SERVICES

We offer a broad range of services for stimulation and pumping and well bore clean-up needs.

An effective Wellbore clean out is a critical step to restoring the production of a well, and enabling an access to the Well bore for subsequent evaluations or treatments that are a crucial part of Wells life cycle.

Our well bore cleanup services are customized to give insurance to completions, deliver better wells by extending Well life, maximizing Well performance and reduce wellbore damage and environmental impact.

Our capabilities include stimulation through coiled tubing and high-speed pumping.

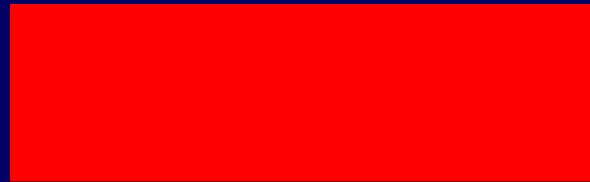

We provide:

- Pumping rates of 50BPM and 10,000PSI
- 100BBLs Fluid storage capacity on location
- Crews and equipment experienced in on-shore and off-shore work
- Data acquisition system to monitor and record real-time rates and pressures
- Fluid filtration units available
- QA/QC control of fluid mixing and pumping on location
- Deployment of various clean up tools and chemicals

Wellhead maintenance services

RUXLEY is a provider of Valves and wellhead maintenance services. Our Competent technicians can work on all types of actuators and valves. We can supply and advise OEM spares and alternatives engineered to OEM specifications for high performance with fully synthetic greases and sealants and are able to perform most repairs in-situ. We provide services for

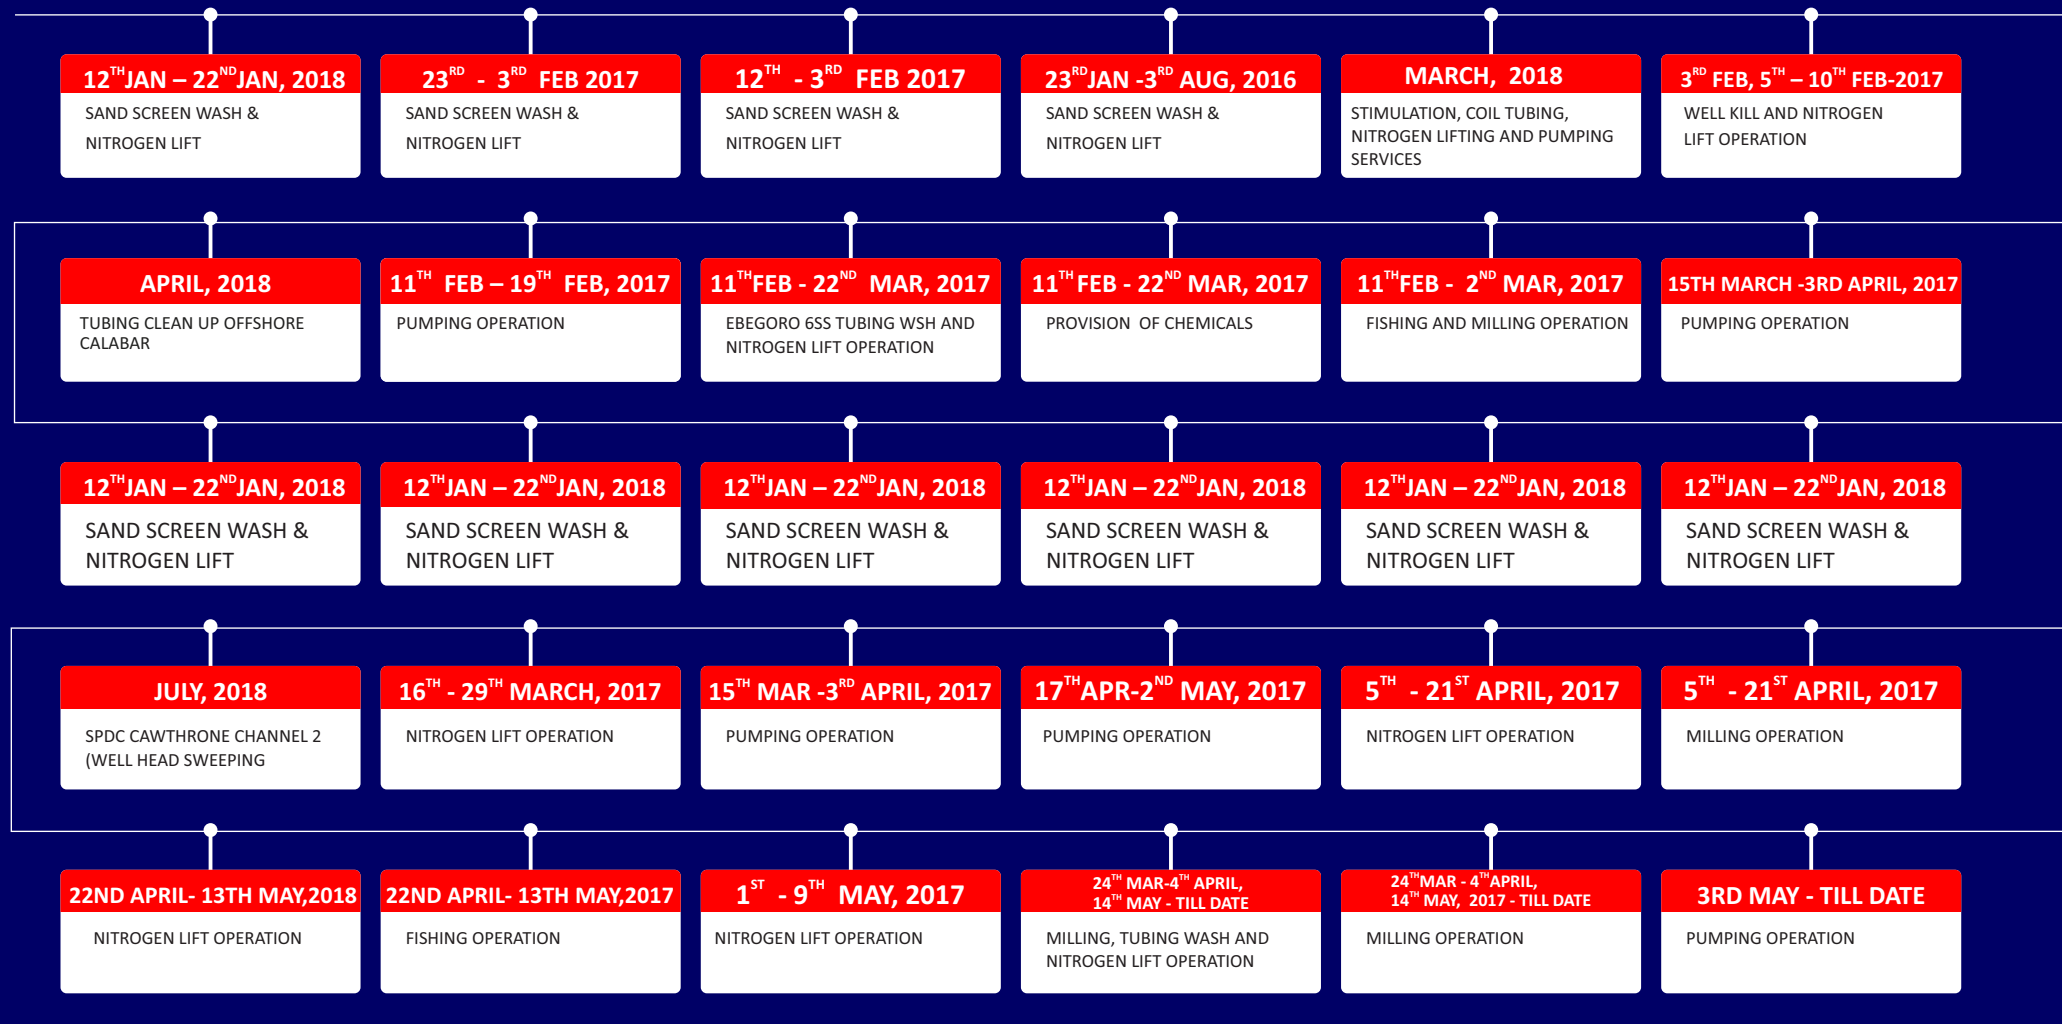

Some of our Equipment Rental Services include;

- Coiled Tubing Units
- Nitrogen Units
- Wireline Trucks / Skids
- Slickline Units
- Auxiliary Equipment
- Various downhole tools
